# Built on Customer Confidence

The Hypor Libra sow stands out for her strong underline, excellent mothering ability, and ability to produce high-quality piglets. Just as importantly, she is highly feed effcient, making her an exceptional all-around choice.

*Hog Operation Manager at Bluegrass Farming Hog Operation*

As an independent, family-run farm, we value partners who are flexible and willing to think beyond standard programs. From the start, Hendrix Genetics Swine was open to our ideas and committed to helping us reach our goals. Most importantly, they've delivered. The genetics have performed as promised, especially in meat quality, and the hands-on support from Chad and Garret has made a real difference.
