Gestal SELECT

JYGA Technologies

Designed for commercial and research applications alike

The ultimate feeder for performance testing and genetic selection, designed for efficiency and precision.

PRECISION FEEDER FOR FINISHING, GILT DEVELOPMENT AND BOAR SELECTION

THE GESTAL EFFECT

ACCURATE DATA COLLECTION

- Records individual feed intake automatically using RFID tags.
- Timestamps entry and exit for precise monitoring.
- Makes monitoring a breeze: access reports, feeding curves, history, and more through the VISION software.

OPTIMIZED FEED INTAKE AND GROWTH

- Lowest cost individual performance feeder on the market!
- Delivers custom diets directly to each pig,
- Reduces waste and improves efficiency.
- Adjusts the diets as often as needed per pig and pen.

STREAMLINED OPERATIONS

- Color-coded alerts and automated reports save monitoring time.
- Keeps you informed of any irregularities, such as feed outages, with alerts displayed directly on the farm computer.
- Detects feed issues early to prevent costly problems.
- Automated feeding frees staff for critical tasks.

EASY IMPLEMENTATION AND MAINTENANCE

- Easy to use by workers of all experience levels.
- Waterproof and dustproof motorbox.
- Built with robust, high-quality materials that are barn-resistant.
- Fits any farm, new build or retrofit.
- Compact design offers flexible positioning.

VISION SOFTWARE

Know the state of your herd at a glance

Access reports, feeding data trends, feeding curves, history, and much more, empowering you to optimize operations with precision and ease.

In-farm and cloud data management available.

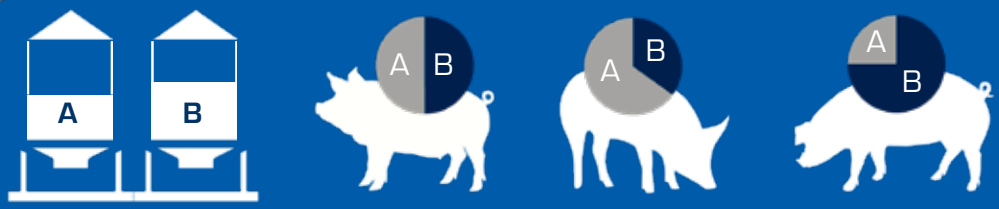

Opti FEED BLENDING OPTION

TAILORED NUTRIENT DELIVERY

- Blends combinations of distinct individual diets.
- Minimizes over-formulation and reduces excess nutrient excretion.
- Allows to feed according to sex, weight, size, and growing phase.

GESTAL IN GDU: THE VIRTUOUS CYCLE

OPTIMIZED PIG HEALTH AND PERFORMANCE

- Feeds according to the nutritional needs of growing pigs, optimizing performance and body condition.
- Lays the foundation for high-performing sows.

OPTIMIZED BODY CONDITION

- Prevents overfeeding (which can lead to excessive fat deposition) and underfeeding (which can delay puberty and reduce reproductive performance).
- Maximizes genetic and nutrition investments.
